4. [redacted] 25X1
 The machines would be delivered without extras and the seller would receive 10% commission. The prices to the end-buyer would be 5% below prevailing prices in the country concerned. Spare parts would be delivered from local warehouses still to be set up. Representatives would be expected to have a turnover in these machines of DMW 500,000 per year. Machines would be delivered to representatives in consignments of 20,000 dollars worth. References as to the worth and quality of the machines could be obtained [redacted] 25X1
 [redacted] which had bought a Universal milling machine and found it most satisfactory.
5. If the [redacted] sales manager so desired, the following machines could be obtained from Poland and Czechoslovakia: 25X1
- | | |
|-----------------|--------------------------|
| Poland | Boring machines |
| | Capstan lathes |
| | Grinding machines |
| | Gear cutting machines |
| Czechoslovakia: | Slotting machines |
| | Boring and turning mills |
| | Plate shearing machines |
| | Saws |
6. The Hungarian machine tools were being delivered both to Poland and to the USSR, together with textiles, in exchange for materials which were short in Hungary. Poland was supplying coal and all types of ores; and nonferrous metals, particularly bronze and zinc, were being supplied by the USSR.
7. The Technoimpex employees inquired as to where they should go to obtain cutting tools for a horseshoe calk cutting machine.

* [redacted] Comment: Now named the Rakosi Works.
